2022-2024 THREE YEAR STRATEGIC PLANNING GOALS

Last year, we embarked on a strategy to evolve Hy-Tech from Good to Great. Together, we had built a company that was valued by our customers, and played an important role in our employees lives and in the communities we operate. We realized that our people, our processes, and our equipment enabled us to outperform any other drilling company in terms of meters per day and operate at an incredible 99.7% uptime. Our performance versus competition was even stronger when faced with more difficult terrain. We also realized that we were entering an unprecedented mega-cycle of increasing demand for critical minerals. This opportunity presented us with a chance to stretch and grow, to serve our customers when they needed us the most.

Here is an extract from an April 2022 Industry report from E&Y on the demand challenges Mining companies are facing:

“The energy transition has picked up momentum, driven by a global regulatory push, changing stakeholder expectations, evolving customer behaviors and new emerging technologies. The 2021 United Nations Climate Change Conference (COP 26) is driving increased momentum as more countries set carbon reduction targets and many governments have announced net zero targets in line with the Paris agreement. This will lead to an increase in the deployment of clean energy technologies such as renewables (low-carbon power generation), battery storage, electric vehicles (EVs) and associated infrastructure.

By 2030, electric vehicles are expected to make up nearly half of global light vehicle sales, and significant investment is planned for charging infrastructure. In addition, the International Energy Agency (IEA) is forecasting a doubling of renewable energy capacity under its STEPs scenario by 2030 and a whopping 291% increase by 2050. Under the IEA’s Sustainable Development Scenario, renewable capacity is expected to increase by almost six times by 2050.

However, there is likely to be a gap between supply and demand, and miners will need to commission new projects and operations to support the expected demand. For example, lithium production must quadruple from 490kt in 2021 to 2mt in 2030 to meet growing demand. In absence of further mine development, the lithium market deficit is projected to reach 700kt by 2030. Similarly, the copper market is expected to be in a nearly 4.7mt deficit by 2030 on current projections of supply.

This poses a significant challenge to the mining and metals sector in terms of resource availability, access to capital and efficient supply chains. The energy transition is going to be expensive, and the mining and metals industry will need to invest US\$1.7 trillion over the next 15 years for enough supply of copper, cobalt, nickel and other critical metals. It is estimated that close to US\$100b needs to be invested to bridge the copper supply gap of 4.7mt by 2030, while close to US\$21b would be needed to finance the pipeline of lithium production capacity out to 2025. Significant capital investments and long lead times indicate that mining companies need to take bold capital decisions now to build supply of critical minerals.”

And that is where we fit in. As we have ramped up our capabilities, we have attracted increasing interest from the top mining companies to become a more integral part of their global operations. They need our expertise. Our innovation. Our culture.

Thank you to everyone for all your efforts in helping to reach our goals.

BUSINESS DEVELOPMENT

WHAT OUR CLIENTS ARE SAYING

"I have just finished 10 days at Brucejack and wanted to reach out to give your team here a big shout out. I understand that your UG foremen Dan and Elie have been here a while, they are a credit to your business. Very proactive and proud of what they do and it shows. Very strong leadership and you can see that the crew have a lot of respect for them. Devin running the surface team is very professional and has a great attitude. I always appreciate working with your teams and their unique level of professionalism".

- Travis Neenan (Newcrest Mining)

PRESENTING OUR LEADERSHIP TEAM

Harvey Tremblay - Chairman

Harvey Tremblay serves as the Chairman of Hy-Tech Drilling Ltd. Mr. Tremblay entered the mining industry after several years in construction, working his way from service work at drill sites, to exploration services, and later Diamond Driller and Foreman. In 1991 Harvey founded Hy-Tech Drilling, and has since grown the company from a single drill domestic operation to a global fleet of over 55 drills with operations throughout Canada, the USA, Chile, Portugal, and Spain.

Harvey is the past director of both the Canadian Diamond Drilling Association and the Association for Mineral Exploration Services BC. Mr. Tremblay works alongside the President and Advisory Board of Hy-Tech Drilling to determine and execute the strategic direction of Hy-Tech Drilling.

Brian Butterworth - P. Geo., President

Brian Butterworth has served as the President of Hy-Tech Drilling Ltd. since 2014 and brings with him over 30 years experience in mineral exploration and mine development. Previously, Brian was Vice President of Mining Investment Banking for a national brokerage firm from 2006-2011. Later, he was Director of Global Exploration at a multinational mining company where he was tasked with managing exploration programs throughout the Americas and Australia. Mr. Butterworth is a registered Professional Geoscientist, a registered member of the Association of Professional Engineers and Geoscientists of BC and previously sat as committee chair for organizations such as AME BC and the Vancouver Mining Exploration Group.

Mr. Butterworth collaborates with the Sr. Leadership Team to determine and execute the strategic direction of Hy-Tech Drilling. Following the formation of an Advisory Board, Brian will work with the board to gather, evaluate, and leverage new insights to make timely, well-rounded decisions in the best interests of Hy-Tech and its stakeholders.

Bill Krasnozon - VP Operations

Bill Krasnozon joined Hy-Tech in February of 2021 as the Underground Operations Manager for the expansion of the underground coring across Canada, and has recently been promoted to the position of VP Operations. Mr. Krasnozon has been in the Diamond Drilling Industry for over 40 years where he started out as a Driller's Helper after graduating from Sir Sandford Fleming College with a Diploma in the Resource Drilling Program. He worked his way up from the position of Driller's Helper to being the Regional Director of a Global Drilling Company, gaining extensive underground and surface knowledge and leadership experience both in Canada and Internationally on specialty drilling projects.

Bill will be responsible for the Drilling Operations, providing leadership, support and mentorship to the Operations and Field Scheduling Teams for the continual strategic growth of Hy -Tech Drilling following the Company Purpose and Vision. Bill will also continue supporting and directing the Hy-Tech Griffith Drilling Ltd. Joint Venture in Chile.

BUSINESS DEVELOPMENT

ISO QUALITY, SAFETY & ENVIRONMENT SURVEILLANCE AUDIT & CDDA'S DEC CERTIFICATION AUDIT

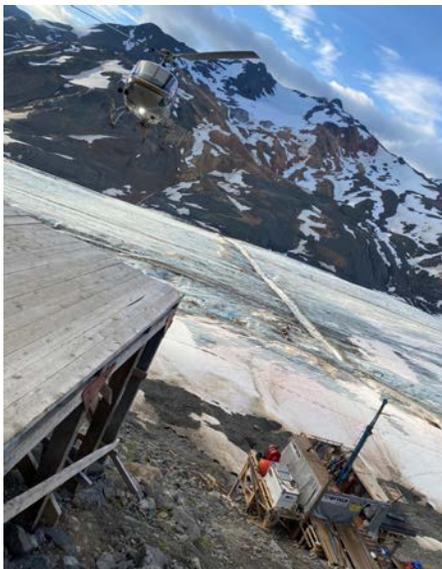

Hy-Tech is committed to continuously improving our quality, safety and environment management system. A safe and healthy workplace is everyone's right and responsibility and so we are pleased to have successfully completed and passed this year's ISO 45001:2018 Safety Standard, the ISO 9001:2015 Quality Standard Surveillance audit, and the DEC recertification audit. This process helps us to identify, control and eliminate the occupational and safety risks associated with our work. This year we also successfully passed the ISO 14001:2015 Environmental Standard Surveillance audit, showing our commitment to upholding high environmental standards everywhere we work by minimizing our land impact, reducing water consumption, and restoring sites.

External Auditors Bert Hettrich and Beate Dizinger spent 1 week auditing our Saskatoon and Smithers Branches. Thanks to everyone that took part in this year's audit and to all employees who work hard daily to help Hy-Tech provide predictable performance, value and peace of mind to our stakeholders. Your dedication to Hy-Tech's continuous improvement makes Hy-Tech a company that we can all be proud to be part of.

BRUCEJACK - UNDERGROUND AND SURFACE

Both underground and the surface fly work has been going well at site as shown in this recent email from our client - Newcrest Mining who recently purchased the Brucejack Mine from Pretium.

JOBS OPERATIONS

MACON SHACKS ARRIVE IN CHILE

The two Hy-Tech Macon Shack Drills arrived in La Serena Office on the 10th of August. Thanks to everyone who took part in making this happen as it was much appreciated. Curtis Johnson will be working with the La Serena Team in putting the drills together and making them ready for their first project.

CHILE

The Hy-Tech Griffith JV is progressing well with three active project sites with Teck and Lundin. We are addressing the challenges that confront us and overcoming them. Ivan Aguayo has been spending time with the Accounting Team in La Serena and Clayton Bolduc has been helping out on the Operational Side. As it is summer here in Canada, it is the winter season in the mountain regions of the Andes which has caused delays due to the winter storms that have hit the region. The snow depth surrounding the drill is just over 4.5 meters. It took some time to clear the roads to access the drill, and operations were shut down due to these storms with high winds and an abundance of snow.

JOBS OPERATIONS

NEWCREST - UNDERGROUND

Underground drilling has commenced on the Naghā exploration decline! This is an exciting milestone for the #RedChris exploration team. Drilling underground reduces the surface disturbance and allows our crews to more easily explore year-round - a huge plus when you're working so far north. Underground exploration drilling is different from underground mining. The purpose of underground drilling is to help us further define the Red Chris resource whereas underground mining involves extracting ore from beneath the surface.

TRAINING

DRILLER'S HELPER AND DRILLER TRAINING PROGRAMS

Recently we have completed two full Driller Helper Training Programs in Smithers. Thanks to Wesley Keating, Justin Smith, Braden MacDonald, Pat Bourgeois, and Barry Nabess for conducting these programs. In addition there was the completion of a trial Driller Training Program for four Driller Trainees.

We look forward to another full Driller Helper Training Program beginning in Sept. 2022.

TRAINING TEAM GROWTH & DEVELOPMENT

- Wesley Keating successfully completed Leavitt Telehandler Train the Trainer Program.
- Welcome Liam Bradley into the Training department in his new role as Field Trainer.
- Hy-Tech is happy to announce its first dispatch of a Field Trainer (Wesley Keating) to the USA to assist with crew development in South Dakota.

Liam Bradley

WE'RE LOOKING FOR YOUR PHOTOS & TESTIMONIALS

We are always on the lookout for great photos and testimonials that we can use on the Hy-Tech website, newsletters, advertisements, and training programs. If you have a photo or testimonial you would like to share, please send it to admin@hy-techdrilling.com. If we use your testimonial, your name and job title will be attached to the quote on the advertisement. You will also receive swag bucks if we use your photos or testimonials, so send them in!

FROM STEVE PASSMORE - SUNLIFE REPRESENTATIVE

Hey Crew,

Thanks for taking the time to reach out! We've so enjoyed speaking with many of you over the past few months. We recently emailed out a Market Update. If you didn't receive it and would like to, shoot me a text and we'll get your email address updated.

If you did receive it and do not wish to be on our mailing list, please just let us know and we will remove you.

Contest Time *win a gift basket*

steve.passmore@sunlife.com
250-214-2929

If you'd like to join the fun, simply:

1. Upload a photo of you and your pet(s)
2. Post it to your preferred social media channel
3. Tag us on Facebook or Instagram

The winner will be determined by # of likes by October 21st

TD1 TAX CREDITS - RESET TO BASIC

After September 15, 2022 we will be switching to a new payroll system. As part of this move each employee's personal tax credits will be set to the basic amount for each applicable province. This includes any additional tax that is coming off each pay.

If you would like your tax credits to be greater than the basic amount or want any additional tax to come off each pay, please complete the applicable TD1s and return to payroll@hy-techdrilling.com. Let us know if you would prefer a Docusign version and we will send it to you.

EHS - SAFETY IS A TEAM EFFORT

CHIEF INSPECTOR OF MINES AWARD

Hy-Tech received the Chief Inspector of Mines Award for 2021 - This award is a recognition award that is presented to a mine site, individual or contractor that have accomplished outstanding achievements in health and safety or that have greatly advanced health and safety on site. The award is based on merit and is intended to recognize safety efforts rather than safety statistics.

INTERNAL COR AUDIT

Matt Kilback completed the Internal Auditor course with Energy Safety Canada in Calgary in June. He will be conducting an Internal COR audit in the fall.

The Certificate of Recognition (COR) is maintained for many reasons:

- It is an effective tool to measure how well the Safety Management System is working and where we can improve.

WCB rate discounts are awarded in certain provinces for being COR certified and maintaining the COR certification on an annual basis.

FIT TESTING - RESPIRATORS

The purpose of having a Silica Exposure Control Plan is to set out a standard approach to protecting our workers from harmful exposure to airborne silica dust in both surface and underground drilling operations. Hy-Tech Drilling has a duty to protect our workers from silica exposure on all of our worksites. Studies show that drilling work tasks involving jack legging, mixing cement, mixing bentonite, and some underground environments generate airborne silica exceeding recommended maximum exposure limits of 0.05 mg/m³. Effective controls are available to protect workers from harmful exposure.

Members of the EHS team are now certified to complete fit testing for employees: Yoann Bellehumeur, James Flahive, Justin Smith, Kristi Zaretski, Jim Butler, Matt Kilback, Barry Nabess, Brooke Utz-Kuemper and Lindsey Beal.

Does respirator fit matter?

If a worker's respirator doesn't seal properly, there's no certainty it is providing the expected protection.

HUMAN RESOURCES

VANINA AND MARCELA VISIT

In July we were visited by Marcela Rivera and Vanina Airoidi who both work for our Joint Venture, Hy-Tech Griffith Drilling Chile. Marcela is the Head of the Risk Prevention Department and Vanina is the Argentina Branch Manager.

The visit was to focus on relationship building and to introduce Marcela and Vanina to some of the Canadian support teams that they'll be working with to develop a successful Joint Venture. The ladies spent a lot of time with many departments including Safety, Training, Management Systems, Contracts, Human Resources, Scheduling, Recruiting and Purchasing, and were exposed to how we manage our drilling support for Canadian Operations. The EHS team accompanied them on a field visit to Newcrest's Red Chris site, where they were able to see the drills in operation as well as meet up with some of the Chilean drillers that are working in Canada for the summer. We also had an opportunity to take them on some community excursions, including a trip to 'Ksan Village where they had the opportunity to do a little totem pole carving, a visit to our local Museum and a rainy hike up to Twin Falls.

Back in Chile now, they are working along with their Canadian contacts to not only determine and implement the Canadian processes that they feel will work well for them, but also to teach Canadian Ops some of the processes that they have which would be beneficial to implement in Canada. Thank you Marcela and Vanina for taking some of your valuable time to visit us and your interest in learning about our Canadian Operations - we look forward to learning more about Hy-Tech Griffith Drilling Chile from you in the years to come.

Hy-Tech has successfully integrated 6 Chilean Drillers this year starting with Drill Orientation in Smithers as well as drill training for 3 of the 6 who were new to the program. Two Chilean workers arrived on August 12th and received training in preparation of their trip to Red Chris. The Training included First Aid, Transportation Endorsement, all DATS Required Training, Rod Handler, Lock out/Tag On and iPad training.

Extra thanks to Ricky Cayer for translation and drill orientation support at the Smithers branch location. And thanks to Stephane Larocque and Luis Zamora Adaros for continued translation support in the field. Also thank you to Nicole Britton for coming in on short notice to assist with the Chilean worker training and for providing translation services, Your contribution helped to make their onboarding a success.

NEW HIRES

WELCOME.....

Andrew Gerow - HR Coordinator

Andrew has joined the team in Saskatoon as an HR Coordinator. He is a recent Bachelor of Commerce graduate from the University of Saskatchewan and is excited to start his new career in HR at Hy-Tech. Andrew brings with him 10 years of field experience in the construction industry as a Civil Engineering Technician. In his free time, Andrew enjoys spending his time at the gym, with aspirations of doing a fitness competition in the future. He also has two dogs, Kaia and Brisket, who keep him very busy. Andrew is excited for this opportunity with Hy-Tech and is looking forward to getting to know the rest of our team.

Luciana Silva - Administrative Assistant

Originating from Brazil, Luciana immigrated to Canada in 2013 along with her husband and their two children. She possesses work experience and formal education in the field of Environmental Biology, working in medium and large sized private corporations. Their family spent 3 years in Maple Ridge, BC before moving to Smithers in 2016 and has been there ever since! In her spare time, Luciana enjoys spending quality time with family, friends as well as gardening and crafting (quilling and woodburning). Luciana is excited to join the Hy-Tech team and continue to grow with Hy-Tech.

Doug Skeates - Chief Financial Officer

Joining us from Prince George, BC is Hy-Tech's new CFO, Doug Skeates. Doug is a Chartered Professional Accountant, Certified Accountant and brings Public Accounting experience with him from Deloitte. He has over 10 years experience operating in a CFO capacity, working within companies with annual revenues exceeding \$200 million. Doug's previous industry experience includes Industrial Construction, Oil & Gas, Heavy Civil Construction, Bioenergy and Mining. Doug has also worn the hats of entrepreneur and shareholder of privately owned companies for over 35 years. He looks forward to leveraging his extensive background to add value to Hy-Tech's forward-looking strategic growth. In his spare time Doug enjoys travelling with his wife, Maurie, and spending quality time with his three children and three grandchildren. Doug also plays an active role in the hockey community by running hockey camps as well as coaching.

Francisco Osorio Carrasco - Mechanic

Francisco Osorio Carrasco has come to Saskatoon from Santiago Chile. He is 36 and has 2 sons named Vincente who is 12 years old and Santiago who is 3 years old. Francisco enjoys time playing sports, running and practicing Taekwondo in his free time. He also enjoys barbeques, fishing and sharing time with friends.

Nicole Britton- Administrative Assistant / Translator

Nicole was born in Smithers BC but has lived half of her life in Hermosillo Sonora Mexico with her family. She is now back living in Canada after living in Mexico for the past 7 years. In her spare time, she enjoys going on hikes, paddle boarding, taking her two dogs out for walks and spending quality time with friends and family. She is thrilled to be part of the Hy-Tech team and growing her career with the company!

JOB FAIRS ATTENDED BY HY-TECH

Hy-Tech continues to recruit employees for both operations and support roles in the office and shop. In person career fairs are in full swing, and Hy-Tech participated at three this summer in the Saskatoon/Manitoba area. Thank you to Jenni Downing and Lindsey Beal for representing Hy-Tech.

- Saskatoon Polytech hosted a career fair in Prince Albert and Saskatoon. Special thanks to Wesley Keating for attending this one!
- The community of Patunak, located in Northern Saskatoon hosted a career fair at their local high school to bring awareness to employment and training opportunities in the local area.
- The community of Flin Flon, Manitoba hosted a career fair when the local Hud Bay Mine shut down. This career fair was a huge success.

EMPLOYEE REFERRAL BONUS

Don't forget to take advantage of the Employee Referral Bonus if you know someone who would help grow the Hy-Tech Team. Ensure the applicant submits their application through our website and references your name. Send in an email to referrals@hy-techdrilling.com with their name so we can watch for the application. Hy-Tech experiences a high volume of application so this is an important step! Please reference your local Employee Referral Policy for additional information on this program.

ANNOUNCEMENTS

Jenni Downing has been promoted from Administrative Assistant to Office Coordinator. In her 3 years working with Hy-Tech, she has gained knowledge of Hy-Tech's Management Systems and Administrative functions while fulfilling a multitude of responsibilities. In her new role she will oversee Hy-Tech's Administrative Team, manage corporate and staff events and associated advertising, as well as coordinate providing administrative support to other departments. Jenni will also provide support to the Branch Management Team for correspondence, meetings, special projects and coordination of activities in the office. Congratulations on taking this next step. We wish you continued success as you pursue this exciting opportunity.

IT TALK

MEET THE TEAM

Mark Hessels - I.T. Manager

Originally from Southern Ontario, Mark moved to Smithers BC in 2016. In 2019 he was hired on as an I.T. technician and later moved into the Manager position after Martin left. Mark enjoys working with everyone at Hy-tech, helping to fix their computers and also coming up with new systems to make work easier and more efficient. In his spare time Mark enjoys hiking, hunting, fishing, kayaking and snowboarding and spending time with his family.

Graham Coldwell - Computer Technician

Graham enjoys the fast-paced environment and ever evolving world of computers technology. It will be coming up to his 5-year mark working at Hy-Tech and close to 20 years in the computer environment. Ever since he was a kid he has been playing with electronics and computers, from writing code for the first computers that came out to creating electronic circuits to make radios. In his off time you will find him on a bike of some sort climbing a hill.

GIVING BACK

Hy-Tech has been a proud sponsor of many golf tournaments this summer that support community initiatives including: Saskatchewan Geological Society 34th Annual Tournament, CIM Red Lake Golf Tournament, KEG's 2022 Ab Ablett Memorial Golf Tournament, CMTN Foundation Golf Scramble, Smithers 7th Annual Golf for the Community Fundraiser, Smithers Exploration Group - Miners Golf Tournament, CDDA Overburden Golf Tournament, BVCS Golf Tournament.

HATS 4 HANK

Coby's son, Hank, is currently undergoing cancer treatment at BC Children's Hospital, and so the de Vries family is spending many hours at Ronald McDonald house. Their friend had hats printed to show support to Hank throughout his treatment. Proceeds were donated to Ronald McDonald House in Vancouver. Hank is officially in remission and in good health and spirits!!

The Hats 4 Hank Fundraiser brought in \$460 which will go to help families in the Ronald McDonald House in Vancouver. In addition, Race for the Kids raised over \$30,000 for the BC Children's Hospital through employee matched donations!

Thank you for your contribution to an amazing organization that takes care of BC families with children undergoing treatment.

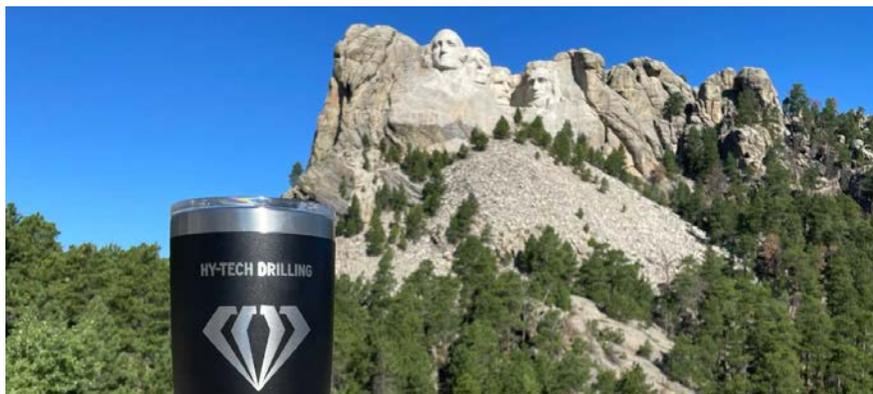

Ronald
McDonald
